GORE® SEAMGUARD® Bioabsorbable Staple Line Reinforcement is crafted from a 3D matrix of bioabsorbable material unlike anything else available.

▪ Provides reliable protection from surgical complications associated with leaks and bleeds.
▪ May contribute to shorter hospital stays, decreased costs and lower morbidity rates.
▪ Adds strength to the staple line during the critical healing process.
▪ Absorbs gradually and predictably, usually within six to seven months with minimal inflammatory response compared with other buttressing materials.
▪ Trusted by bariatric surgeons for more than 15 years, representing more than 3 million implanted devices and more than 60 peer-reviewed articles.

For over 40 years Gore has relentlessly focused on leveraging our material expertise into purposefully crafted solutions.
